

1 After pouring concrete, use a garden hose to wash down ICF walls. **ALLOW TO DRY BEFORE INSTALLING!**

INTERNAL CORNERS
Cut 16" to 24" by full width strips. Fold in half. Start at the bottom & after removing the paper backing, install, in shingle fashion up the wall. Apply equally & evenly to both sides. Make sure to apply into the corners to no air pockets are left behind.

EXTERNAL CORNERS
Cut full width to height required. Fold in half. Start at the top & after removing the paper backing, install, downwards. Apply equally & evenly to both sides. Make sure to apply into the corners to no air pockets are left behind.

PEEL & STICK INSTALLATION

WORKING TEMPERATURE 2°-38° C (35°-100° F)
ALWAYS USE SCREWS NOT NAILS!
USE 2 PEOPLE.
INSTALL ONLY ON DRY SURFACES.
ENSURE FULL CONTACT WITH WALL SURFACE BEHIND USING HAND OR PLASTIC ROLLER

1a **ALTERNATIVELY** Brush down ICF walls to remove dust & dirt

1b IF the ICF has been exposed to sunlight for long periods, has discoloured & become powdery on the surface, **PRIMER** should be used

INSTALLATION

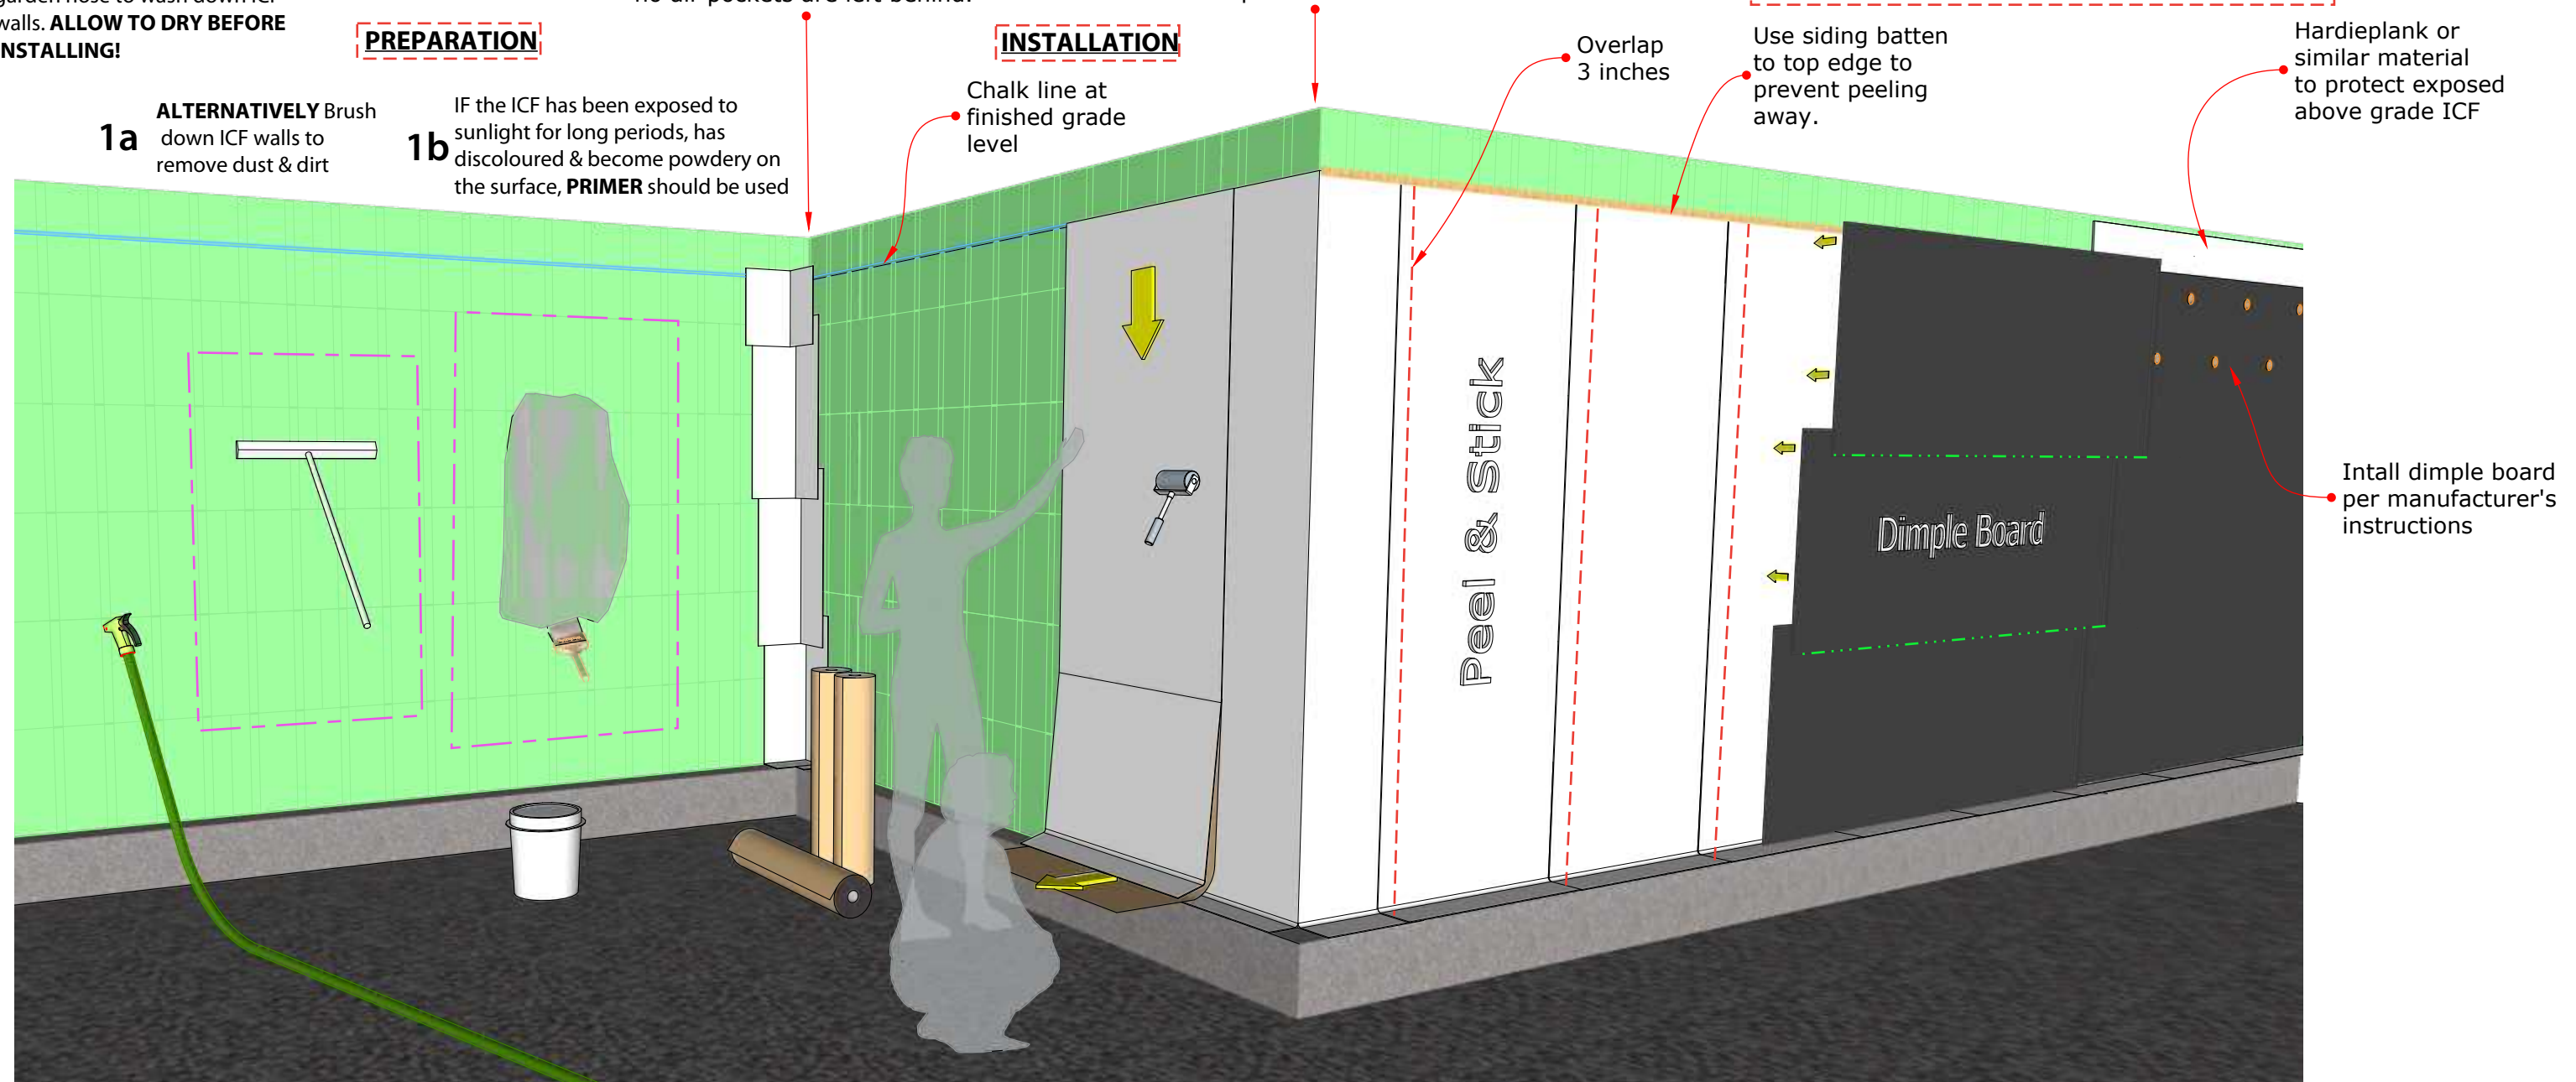

Chalk line at finished grade level

Overlap 3 inches

Use siding batten to top edge to prevent peeling away.

Hardieplank or similar material to protect exposed above grade ICF

Intall dimple board per manufacturer's instructions

PEEL & STICK: Self-adhesive waterproofing membrane specifically for application to ICF. It is designed for below grade use only. It must not be used above grade. Supplied in rolls, 36" wide. Coverage 225 sq ft, 210 sq ft net.

Care should be taken to protect Peel & Stick from moisture, dust & general wear & tear. Store rolls in a cool, dry location, not in direct ground contact and protect with a tarp to prevent exposure until ready to use
